

Some experience when traveling Phuot

- When should travel in groups, preferably 4-5 vehicles a group. Each group should have an experienced lead, other members not overcome this.
- The group members tried to cover each other, avoid each other out too far. Absolutely not arbitrarily separated groups
- To the junction leading to the stop and directions for the next car. The last person to pawn the car repairs.
- Each car should be separated for at least 60-10 m, unfortunately if a fall or a car before the car after the tire explosion will not need to.
- Do not go side by side, limiting the car to talk to the other road.
- If the person sitting in the driver firmly fast to suggestions, even claim to request a car or other transport groups.
- Always reduce speed when the crab, run your hands all stations, not cutting insect.
- Wide legs to balance when on the dirt road, slippery.
 - Keep headlights on and continually reinforced the road at night school, has helped focus more on the way just for media attention in reverse. (According TTOL)
